

**Name** \_\_\_\_\_

**Mrs. Blair, Mrs. Sulkowski, and Mrs. Schmidtfranz**  
**Animal Projects**

**When: Week 7**

### **At Home Science Projects**

**For this project, you will be taking the role of a zoo keeper at a newly opened zoo in Perry, Mi. Your job is to complete your animal report as though you are explaining your animal to a crowd of people who have come to listen to you at the zoo grand opening. You can either video tape this presentation, do a slideshow, or do paper pencil. The choice is yours. If you do decide to video tape this, please send your video to your teacher's email. Don't forget to dress like a zoo keeper. Teachers will be compiling videos for a youtube video. If you would prefer not be included in this, just let your teacher know, thanks and have fun!**

Students will be responsible for an animal report, which will be completed at home. This report will be on a student-selected topic. Students should complete a presentation if possible. This can be a video of you reading the report or a slide presentation with pictures from your report. Projects should be completed by June 5th. Video taped presentations should be a maximum of 3 minutes long.

You may use books, magazines, or the internet. Please ask for a parent's help when looking up animal facts on the internet. We recommend safesearch.com when looking for information online. Remember to list your sources for your project.

#### **No internet:**

If you don't have the internet, that's ok too. You can write your report on the paper provided. Take pictures of each page and send them to your teacher if you are able.

Sources (Names of books, magazines, or websites that you used.)
